Education

Universidade Federal do Ceará (UFC) — Fortaleza, CE, Brazil
B.S. in Computer Engineering — Expected Graduation: 2029

- Participated in Phase Zero of the Competitive Programming Marathon (2025).

EEEP Luiz Gonzaga Fonseca Mota — Amontada, CE, Brazil
Computer Networks Technician (Phase 2 of OBI / Programming Marathon) — 2024

Professional Experience

Universidade Federal do Ceará (UFC) — Fortaleza, CE, Brazil
Computer Vision Researcher (Edge AI) — Aug 2026 – Present

- Trained YOLO models for computer vision using custom datasets and data pipelines.
- Optimized and exported models (TensorFlow Lite) for deployment on resource-constrained embedded devices.

Laboratório de Engenharia de Sistemas de Computação (LESC – UFC) — Fortaleza, CE, Brazil
Junior Front-end Developer — Nov 2025 – Jun 2026

- Developed responsive dashboards and applications with React, Next.js, and RESTful API integration.
- Implemented structural validation with Zod and collaborated in an Agile (Scrum/Git) environment.

Amontada Valley — Amontada, CE, Brazil
Junior Back-end Developer — Jul 2024 – Feb 2025

- Engineered scalable back-end services and RESTful APIs using Python, Django, and Django REST Framework.
- Architected databases and optimized complex data flows with PostgreSQL.

P. Menos Lab — Remote
Junior Back-end Developer — Apr 2022 – Jul 2023

- Developed microservices architecture with Python, Django REST Framework, and PostgreSQL.
- Optimized query performance and actively participated in code reviews and architectural decisions.

Capacita Brasil / iRede (ICT Residency) — Remote
Junior Mobile Developer — 2023 – 2024

- Built the end-to-end Waste Control MVP application in Kotlin, integrating interfaces to REST back-ends.

University Extension Projects

Internet of Things Cell (IoT – UFC) — Fortaleza, CE, Brazil
Lead Developer & Researcher — 2025 – Present

- Prototyped hardware projects, IoT (ESP32), and applied AI, while providing technical mentoring for the community.

Highlighted Projects

Assidui System (Mobile & Back-end)

- React Native app and Django back-end designed to digitize and automate school attendance management.

MonitoraME (Front-end)

- Responsive dashboard in React and Tailwind CSS, focused on high UI/UX performance and managerial data analysis.

LESC ERP System (Full-Stack)

- Platform (React, Next.js, and RESTful APIs) to modernize technical operations and automate laboratory management.
- Implemented Role-Based Access Control (RBAC), scholarship lifecycle management, and data validation via Zod.

- Automated bureaucratic processes with secure flows for the generation and digital signature of institutional documents.

Technical Skills

Languages: Python, JavaScript, TypeScript, C/C++, HTML5, CSS3, SQL.
Back-end Engineering: Django, FastAPI, Django REST Framework, RESTful APIs, Microservices.
Front-end & Mobile: React.js, React Native, Next.js, Tailwind CSS.
Databases: PostgreSQL, MySQL, SQLite.
DevOps & Infrastructure: Git, GitHub, Docker, AWS, Linux/Bash, CI/CD pipelines, Agile (Scrum).
Artificial Intelligence: Computer Vision, Edge AI, YOLO, TensorFlow Lite (TFLite).
Domain Areas: Full-Stack Development, Mobile Development, Internet of Things (IoT).

Certifications

Back-end Development Certification – Amontada Valley (Python, Django, PostgreSQL, REST APIs)
Full Stack Training – Amontada Valley (React, Next.js, Node.js, Docker, Git)
